BURNT OAK
BUZZ! voice of the children®

Children's Digital Newspaper July 2021 Issue 12

In February 2021 another wave of Covid-19 gripped the UK; the biggest yet. With the country locked down, schools were closed once again for all but keyworker & vulnerable children.

Children, parents and staff worked tirelessly to keep to routines as normally as they could; live lessons over Zoom, film and ideas for remote learning filled their days. Through it all, Buzz & Newsround continued to meet weekly over Zoom, their dedication as always second to none as they brought their ideas (& often fun riddles!) to the online sessions.

Yet, despite the best efforts from everyone, children still felt disconnected and couldn't wait to see people 'for real'. It was then that the idea to travel virtually around the world took shape. Buzz decided that they could use Zoom to reach out to others around the world and it turned out that lots of people were really happy to connect with the team, resulting in the children taking their reporting skills global and learning lots along the way. Let's follow their journey as Buzz travel virtually around the world!

TEAM TALK

"We have met some incredible people and are looking forward to introducing you to them! We learnt alot during our travels, not least how the pandemic had affected communities in different countries, and was continuing to do so, but also about culture, diversity, animals, the environment, work, hobbies and real life inspiration.

It was a wonderful virtual trip and who knows, with luck one day we may actually meet in person. We want to thank everyone so much for supporting our 'Around The World' project. Follow this link to watch our Newsround 4 'Around The World' Special:
